# The easiest way to connect to DigitalOcean.

Real-time access to DigitalOcean from wherever you are.

Tap into the agility of DigitalOcean with fast, private connectivity to your development environments. Launch, scale, and manage your applications with a developer-friendly cloud platform built for modern businesses, and a network platform to match. Create secure, low-latency connections between DigitalOcean and other leading cloud providers—all from a single interconnection point.

Connect any cloud to DigitalOcean

DigitalOcean Edge		Cloud Edge	
Gateway	Partner Network Connect	Cloud Interconnect	Cloud Region

◀◀◀ VXC   Megaport Cloud Router   VXC ▶▶▶

Megaport Cloud Router is your key to scalable multicloud and distributed AI.
- Connect existing storage and compute in other clouds with DigitalOcean.
- Seamlessly move data while reducing data transfer fees from major providers.
- Deploy on demand and scale for seasonal needs or specific time-bound projects.

Simplicity: On-Demand provisioning in under 60 seconds. Customers can activate a new connection in a minute via API or web portal.

Scalability & Speed: Bandwidth adjustable from 50Mbps to 10Gbps. Customers can save money by adjusting the bandwidth according to their needs.

Flexible term / Contract type: Month-to-Month. Customers can deploy dedicated connectivity for short-term requirements

San Jose	Equinix SV1/10	Frankfurt	Interxion FRA15
New York	Digital Realty JFK10	Singapore	Equinix SG3
Amsterdam	Amsterdam AMS9/17		

Get closer to the cloud with Megaport.

DigitalOcean Partner Network Connect is currently available in the locations listed above. Customers can access all DigitalOcean data centers in the regions where Partner Network Connect is enabled such as San Francisco, New York, Amsterdam, Frankfurt, and Singapore.
